Thu, 21 Jun 2018 00:37:00 GMT - Inside every modern CPU since the Intel Pentium fdv bug, assembly instructions arenâ€™t a one-to-one mapping to what the CPU actually does. Inside the CPU, there is a decoder that turns assembly into even more primitive instructions that are fed into the CPUâ€™s internal scheduler and pipeline. The ...

Fri, 22 Jun 2018 02:09:00 GMT - Google hacking, also named Google dorking, is a computer hacking technique that uses Google Search and other Google applications to find security holes in the configuration and computer code that websites use.

Google hacking - Wikipedia -

- A computer hacker is any skilled computer expert that uses their technical knowledge to overcome a problem. While "hacker" can refer to any skilled computer programmer, the term has become associated in popular culture with a "security hacker", someone who, with their technical knowledge, uses bugs or exploits to break into computer systems.
