Wed, 20 Jun 2018 23:32:00 GMT - A bee has a pair of large compound eyes which cover much of the surface of the head. Between and above these are three small simple eyes which provide information for the bee on light intensity. The antennae usually have thirteen segments in males and twelve in females and are geniculate, having an elbow joint part way along. They house large numbers of sense organs that can detect touch ...

Fri, 22 Jun 2018 10:23:00 GMT - The University of Floridaâ€™s Institute of Food and Agricultural Sciences (UF/IFAS) is a federal-state-county partnership dedicated to developing knowledge in agriculture, human and natural resources, and the life sciences, and enhancing and sustaining the quality of human life by making that information accessible.

Honey Bee Research & Extension Lab - University of Florida ... -

- A honey bee (or honeybee) is any member of the genus *Apis*, primarily distinguished by the production and storage of honey and the construction of perennial, colonial nests from wax. In the early 21st century, only seven species of honey bee are recognized, with a total of 44 subspecies, though historically six to eleven species are recognized. The best known honey bee is the Western honey bee ...
